

# Membership in the International Ornithologists' Union

Ornithology is a global discipline addressing all levels of biology from ecosystems to molecules, linking basic and applied research, and nurturing education and outreach. The IOU seeks to support, promote, and advance avian biology.

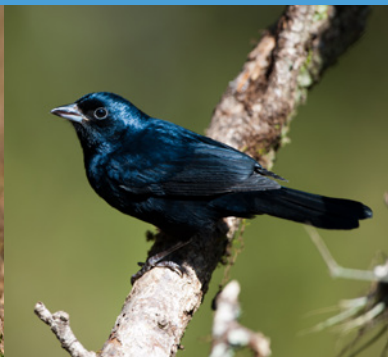

## BY JOINING YOU WILL HAVE ACCESS TO

- an international network of ornithologists and avian biologists;
- IOU members' contact information (available to IOU members only);
- effective collaborations through IOU networks;
- forums and Working Groups on special topics and issues;
- information exchange;
- a Newsletter on a variety of issues relating to international ornithology and avian biology;
- announcements regarding positions (both paid and volunteer), fellowships, university programs, and other opportunities;
- information on meetings, workshops, discussion groups; and
- discounted IOCongress registration fees.

**OUR MISSION** The IOU seeks to support, promote, and advance avian biology by

- 1 disseminating ornithological knowledge;
- 2 interacting with other scientific organizations, foundations and institutions;
- 3 stimulating and strengthening locally-based research that includes the participation of amateur ornithologists;
- 4 cultivating collegial, collaborative, mentoring and mutually supportive relationships among ornithologists internationally and without restrictions imposed by cultural or political differences; and
- 5 fostering knowledge transfer between basic research and applied sciences, such as conservation.
